

**SCAPAP,
a product of
100%, Paper
formed, dry.**

World premiere: Dry Paper Forming Machine DPT (Dry Paper Technology)

Mega Plast has brought together Scafa (with the patent pending packaging solution) and OMG (for 60 years thermoforming machine manufacturer and our partner for over 15 years) to develop a machine that will make it possible to produce this packaging. The first machine will be presented in Jan. 2023 and can be ordered by Mega Plast or OMG

**700mm
x 500mm**

Forming area
700mm x 500mm.

**400µm -
1200µm**

Thicknesses of
400µm- 1200µm

100%

100% Paper

100%

100% Plastic free

Experience

With over 25 years of experience this area we are in the advantageous position that Manufacture of the products with the Construction of the most appropriate Select machine and to associate.

Good Advice

The quality of the OMG manufacturer is after 60 years a matter of course and along with the patent of our partner Scafa we can inform you that we have now the best solution for the paper mold technology.

The Benefits

The entire machine works with servo drives and the Production process is dry what even lower energy costs means. The forms are very simple and therefore also economic, in comparison to the expensive forms of the wet process.
